Score for this attempt: 79 out of 81

Submitted Oct 13 at 10:43am

This attempt took 30 minutes.

Question 1

2 / 2 pts

2.1-1 The client-server paradigm. Which of the characteristics below are associated with a client-server approach to structuring network applications (as opposed to a P2P approach)?

- ☒ There is a server that is always on.
- ☐ There is *not* a server that is always on.
- ☒ There is a server with a well-known server IP address.
- ☐ A process requests service from those it contacts and will provide service to processes that contact it.

☒ HTTP uses this application structure.

Nice! This answer is correct.

Question 2

2 / 2 pts

2.1-2 The peer-to-peer (P2P) paradigm. Which of the characteristics below are associated with a P2P approach to structuring network applications (as opposed to a client-server approach)?

☐ There is a server that is always on.
